

Step A: The palette, as a ColorScheme

The palette implements a dark theme with specific earth-toned text colors to ensure clear visual hierarchy while passing contrast standards against the deep backgrounds.

```
final appColorScheme = const ColorScheme(  
  brightness: Brightness.dark,  
  primary: Color(0xFF561F0F),  
  onPrimary: Color(0xFFE6D3BA),  
  secondary: Color(0xFF442A22),  
  onSecondary: Color(0xFFE6D3BA),  
  surface: Color(0xFF1A110F),  
  onSurface: Color(0xFFE6D3BA),  
  error: Color(0xFF690005),  
  onError: Colors.white,  
);
```

Role	Hex	Used for
primary	#561F0F	ADD TASK and SAVE TASK buttons, Progress Bar fill, active checkboxes
onPrimary	#E6D3BA	Edit icons, scheduled days in modal, secondary buttons
secondary	#442A22	Scheduled days in task configure, secondary buttons
onSecondary	#E6D3BA	Text or icons placed on secondary background elements, such as weekday selectors
surface	#1A110F	Main Dashboard, Success Screen, and Add Edit Task backgrounds
onSurface	#E6D3BA	Task names, section headers (e.g., TASKS), date labels
error	#690005	OVERDUE passive notification highlight, Delete icons
onError	#FFFFFF	Text placed directly on error highlights

Step B: The type scale, as a TextTheme

```
textTheme: TextTheme(  
  headlineSmall: GoogleFonts.abyssinicaSil(fontSize: 24, fontWeight: FontWeight.normal),  
  bodyMedium: GoogleFonts.abel(fontSize: 16, fontWeight: FontWeight.normal),  
  labelLarge: GoogleFonts.abel(fontSize: 14, fontWeight: FontWeight.normal),  
  labelSmall: GoogleFonts.abyssinicaSil(fontSize: 12, fontWeight: FontWeight.normal),  
),
```

Your Style	Flutter slot	Size	Weight	Used for
------------	--------------	------	--------	----------

Heading	headlineSmall	24	Regular	Screen titles (ROUTINE REMINDER, CONGRATULATIONS!)
Body	bodyMedium	16	Regular	Normal Text, timestamps, lists, text field inputs
Button	labelLarge	14	Regular	Primary button text (SAVE TASK, ADD TASK)
Caption	labelSmall	12	Regular	Hints, weekday labels (S, M, T)

Step C: Spacing, as constants

```
class AppSpacing {
  static const double base = 8;
  static const double tight = 8;
  static const double edge = 16;
  static const double standard = 24;
}
```

- Base unit: 8px
- Edge padding: AppSpacing.edge (16px)
- Gap between list items: AppSpacing.tight (8px)
- Gap between sections: AppSpacing.standard (24px)

Step D: Components, as files

These components map directly to the provided mockup screens.

Component	File	Constructor parameters	Appears on
PrimaryButton	lib/widgets/ primary_button.dart	String label, VoidCallback? onPressed	Dashboard, Add Task, Success Screen
ProgressBar	lib/widgets/ progress_bar.dart	double percentage	Dashboard, Success Screen
TaskListItem	lib/widgets/ task_list_item.dart	Task task, ValueChanged onToggle, VoidCallback onEdit, VoidCallback onDelete	Dashboard
WeekdaySelector	lib/widgets/ weekday_selector.dart	List activeDays, ValueChanged onDayToggled	Add Edit Task
CustomTextField	lib/widgets/ custom_text_field.dart	String hintText, TextEditingController controller	Add Edit Task
TimeSelector	lib/widgets/	TimeOfDay time, ValueChanged	Add Edit Task

	time_selector.dart	onChanged	
--	--------------------	-----------	--

Step E: The theme file, assembled

```
import 'package:flutter/material.dart';
import 'package:google_fonts/google_fonts.dart';

final appTheme = ThemeData(
  useMaterial3: true,
  colorScheme: appColorScheme,
  textTheme: TextTheme(
    headlineSmall: GoogleFonts.abyssinicaSil(fontSize: 24, fontWeight: FontWeight.normal),
    bodyMedium: GoogleFonts.abel(fontSize: 16, fontWeight: FontWeight.normal),
    labelLarge: GoogleFonts.abel(fontSize: 14, fontWeight: FontWeight.normal),
    labelSmall: GoogleFonts.abyssinicaSil(fontSize: 12, fontWeight: FontWeight.normal),
  ),
  cardTheme: const CardThemeData(margin: EdgeInsets.all(AppSpacing.tight)),
  filledButtonTheme: FilledButtonThemeData(
    style: FilledButton.styleFrom(
      backgroundColor: appColorScheme.primary,
      foregroundColor: appColorScheme.onPrimary,
      minimumSize: const Size.fromHeight(48),
    ),
  ),
);
```

What Changed, and why

Element	Prelim said	Now says	Why it changed
Type scale	Font families only with Bold/ Light weight variations.	Specific Flutter slots at exact sizes (24, 16, 14, 12) all set to Regular weight.	The instructor feedback required actual sizes to be buildable. Weight variations were dropped because Abyssinica SIL only supports Regular weight on Google Fonts.
Palette	A written table of roles with standard text colors.	A dark ColorScheme object strictly using #E6D3BA and #FFFFFF for all text and icons	Required by the template to provide a coded implementation. The text colors were simplified to uniformly apply the parchment tone, strictly matching the visual mockup
Components	Described visual	Defines specific file paths and strict	Components must take data and callbacks rather than relying on state

	appearance and contents.	constructor parameters mapping directly to the mockup fields.	to ensure they are properly reusable across screens. The list was expanded to include the input fields shown on the Add Task screen.
